

NB: Additional steel deck staging can be added to increase the stage area if required

Mobilestage dimensions

- The maximum overall stage area for the Mobilestage approx 19m squared.
- We can supply additional staging to increase the overall area if required but this will not be under the canopy.
- The stage height is approx 875mm dependent on level ground.
- The Mobilestage vehicle is 6.5m long, 2.5m wide and 3.5m high on the road.
- Once set up the overall 'footprint' is 7.5m by 5m.
- The weight is approx 3,500kg with a trailer weighing an additional 2,500kg where applicable.
- Entrances & gates must be at least 3m wide or wider if we need to turn into them.

Event site

The Mobilestage can be situated in a variety of locations including parks, squares and other open spaces. The section above on dimensions gives the vital information about the Mobilestage.

The site must be available 2 hours before the first event starts. The pack down takes approximately 1 hour from the time the audience leave the area.

Stewards and security

The amount and type of stewards required is event and location specific. If the Mobilestage is to be used for more than one day a secure location overnight must be provided.

Documentation and permission

Permission

Local organisers must ensure that the relevant permissions for the event are in place.

Liability insurance

Miracle Street's public liability will cover all aspects of the Mobilestage and technical equipment. The local organisers must put in place the liability insurance to cover the wider event.

Noise levels

If restrictions on sound levels are put in place we must be informed 7 days before the event.

Weather

In the unlikely event of extreme weather conditions it may be necessary to call a halt to the event if it is unsafe to continue and the equipment or the public are at risk. This decision will be taken by the Mobilestage site manager in liaison with the event organisers.

Technical specification

Power

- The Mobilestage comes complete with 2 super silent 2.6kw inverters in parallel that power the sound rig and inflatable stage canopy.

Speakers

- 2x EV SX300 300w combined range
